

Sell-or-Store: Crop Sale Timing Report

Generated on 22 Jul 2026, 05:40 PM

Farmer & Crop Details

Farmer:	Guest Farmer
Crop:	Rice
Harvested:	2 days ago
Quantity:	100.0 kg

Market Snapshot

Current Price:	Rs 23.2/kg
Predicted Next-Month Price:	Rs 23.07/kg
Market Trend:	Stable
Model Used:	random_forest

Recommendation

Decision:	STORE FOR 14 MORE DAYS
Confidence Score:	68.2%
Risk Level:	Low
Safe Storage Days Remaining:	178
Suggested Selling Price:	Rs 23.2/kg

Reason: Rice is still well within its safe storage period. Predicted prices show a stable trend and current weather risk is manageable, so holding briefly may improve returns.

Weather Snapshot

City / Region:	Bengaluru
Temperature:	30.2 C
Humidity:	43.1%
Condition:	Clear
Data Source:	Simulated (no API key configured)

Storage Cost & Profit Estimation

Revenue if Sold Now:	Rs 2320.0
Estimated Storage Cost:	Rs 534.0
Estimated Spoilage Loss:	8.9 kg
Net Revenue if Stored:	Rs 1567.68
Net Gain from Storing:	Rs -752.32

Selling now appears more profitable in this scenario.
